As a part of the conference I organized a power hour with JILA graduate student Julia Cline. The GRC Power Hour is an optional informal gathering open to all meeting participants. It is designed to help address the challenges women face in science and support the professional growth of women in our communities by providing an open forum for discussion and mentoring.

Co-organized the 2018 Boulder School for Condensed Matter and Materials Physics on quantum information. <https://boulderschool.yale.edu/2018/boulder-school-2018>. The school enables approximately 50 students to work at the frontiers of science and technology by providing expert training not easily available within the traditional system of graduate education and postdoctoral apprenticeship.
